Social Indicators Research
**The interrelationships between the Europe 2020
poverty and social exclusion indicators**
Sara Ayllón and Andrés Gábos

Variables list key (if not obvious):
(all the variables that end with `_x` are means)

Agesq = age squared
Health = poor health status (self-assessed)
Divor = divorced person
Lowedu = low education attainment
Midedu = mid education attainment
Sc05 = number of children between the ages of 0 and 5 in the household
Sc612 = number of children between the ages of 6 and 12 in the household
Sc1317 = number of children between the ages of 13 and 17 in the household
Hsize = household size
Free = the household does not pay rent or mortgage
W200x = wave variables
wi = (dummy) low work intensity
dep = (dummy) severe material deprivation
lagpoor = lagged poverty status
lagdep = lagged severe material deprivation status
lagwi = lagged low work intensity status
poor0 = poor initial condition
dep0 = severe material deprivation initial condition
wi0 = low work intensity initial condition
rx = refers to regions (NUTS 1 or 2 depending on the country)

IRELAND

Convergence based on:
Weighted gradient norm: .0821223 < .1
Relative function improvement: 1.42E-07
Gradient norm: 494.4483
Relative parameter change: .8452008

Log Likelihood: -8526.2171
